Personal website: www.innisfree.net

Brief Biography

What I love about geography is its inherent interdisciplinary nature. Geographers work within the natural sciences, the social sciences, and the humanities. Cross disciplinary work is key to finding solutions to our most pressing social and environmental issues in the 21st century.

Teaching Interests: human geography, environmental studies, geographic information systems

Research Interests: political ecology, geographies of food and agriculture, urban-rural interactions, geographies of tourism and recreation, participatory and critical GIS, and citizen science, critical geographies of children and youth

Office Hours

Day	Time
Tu Th	2:30 - 4:30
Mo We Fr	12:15 - 1:15

Education

- **Ph D Geography**
University of Oregon
Eugene, OR, United States, 2014
- **MA Geography/Landscape Architecture**
University of California, Davis
Davis, CA, United States, 2008
